
Product specification

12V RGB WiFi+RF Smart Floor Light (3.0)

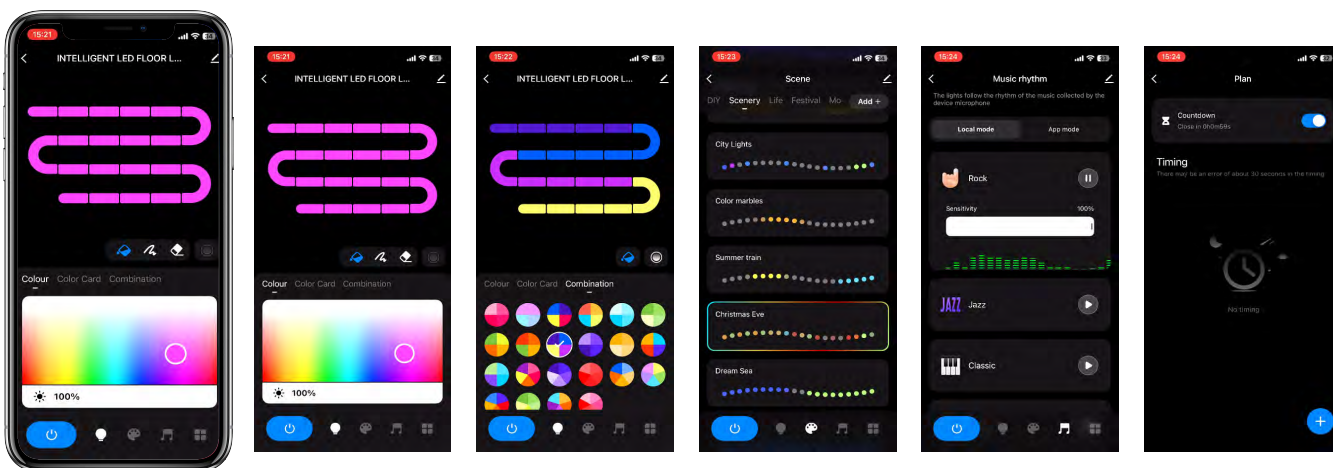

Product Features

- Integrated silicone, seamless connection
- Metal aluminum material lamp pole, no deformation
- Non-slip base that prevents tipping and installation is simple
- 3-sided wide-angle light emitting surface, no video flicker
- 16 million RGB colors, colorful lighting changes
- WIFI + Bluetooth + RF433 communication protocol, controllable via APP
- Work with Amazon Alexa and Google Assistance
- Support for music sync, sound and light synchronization, multiple music modes

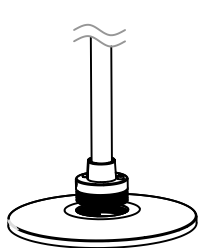

APP Function

Product Installation

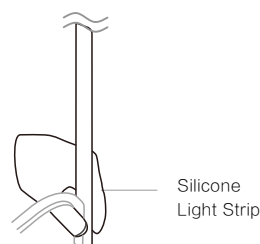

1. Remove the bottom shell and screw it tightly in the control box in a clockwise direction.
2. Insert one section of the metal lamp pole into the control box, insert the connector into the lamp pole slot, insert the second section of the lamp pole into the connector, and use a wrench to lock the screws. Insert the third and fourth sections of the lamp pole in the same way and lock the screws.
3. Take the silicone LED strip light and insert the wiring terminals of the light string into the control box terminals, then install the protective cover.
4. Slide the silicone LED strip light along the lamp pole slot at the bottom and adjust its position appropriately. Connect the power cord.

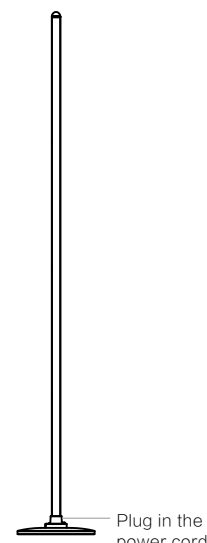

1、Install the base

2、lamp post

3、Install the light strip

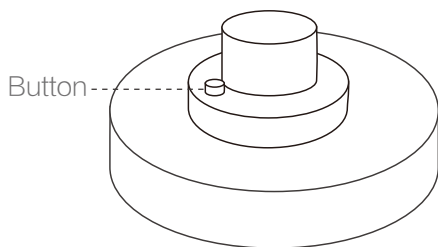

4、Connect the power cord

Application scope: Products are widely used in living room/corner atmosphere decoration, KTV, hotels, etc.
